CorVu Training 2009

Look Inside for:

[Opportunities to
Develop CorVu Skills](#)

[Course Outlines](#)

[Enrollment Form](#)

The CorVu training program builds your capacity to implement and administer business intelligence (BI) and strategy management applications using the CorVu product suite. The benefits of attending our certified courses include being able to:

- ➔ Implement BI systems with best practices for query building, optimising data manipulation, report development, graphing and ad-hoc data analysis.
- ➔ Make the best use of your company's infrastructure for accessing data and deploying CorVu applications.
- ➔ Ensure effective user management and security.
- ➔ Create an effective end-user experience using interactive dashboards, scorecards, strategy maps, alerts and data visualisation.

CorVu Australasia Pty Ltd

Level 8, Tower A, Zenith Centre, 821-843 Pacific Highway, Chatswood NSW 2067
Phone: 61 02 9412 5400 | Fax: 61 02 9411 8833

CorVu offers a variety of training courses at professional training facilities across Australia and New Zealand. The one and two day courses are designed for up to ten students, with the objective of developing practical “hands-on” CorVu skills.

➔ What CorVu courses are available?

The following training courses are available. Course Outlines, with a description of the topics covered, are provided on the following pages.

CorBusiness Applications I	CorStrategy User
CorBusiness Applications II	CorPlanning
CorBusiness Production Reports	CSM System Administration
CorBusiness Application Administration	CorPortfolio/HyperVu

➔ How do I book a place?

To book a place, simply identify the relevant course on the accompanying CorVu Training Enrolment Form and return by fax or email to our Sydney office. Payment must be made by cheque, credit card or bank transfer prior to the course. We also offer a pre-paid training voucher scheme so that you can plan your annual training budget in advance and book staff onto courses with the minimum of paperwork.

➔ When are the CorVu courses available?

The calendar included in this brochure shows the CorVu courses that have been scheduled for 2009. Supplementary courses can be scheduled where and when there is sufficient demand, so *if you have additional requirements please register your interest with us.*

➔ Other CorVu Training Options

CorVu can deliver training in a variety of other forms, including:

On-site Training

We can deliver the standard public training courses, as described on the following pages, on your premises.

Business End-User Training

We can deliver a training course for business users on your premises. The training data is from your own systems and customized to fit the course. This course is described on the following pages.

Customised Training

We can also customise training to meet the specific needs of your organisation.

We also offer consulting services to assist with the design and development of CorVu applications and to extend the CorVu knowledge acquired in the training courses with practical examples relevant to your business. So if you would like to arrange for On-site Training, Customised Training, or any other service from our experienced CorVu consultants, then call the Sydney office and speak to our Training Manager, Customer Relations Manager or our Consulting Services Director.

CorBusiness Applications I

This course is designed for people that want to get a thorough understanding of the features and capabilities of CorVu's Graphical Analysis and Query modules.

Prerequisites: Familiarity with basic Windows functions.

Length - Price: 2 days - \$1,440/student + GST

This course covers:

- Creating Basic Queries
- Modifying Queries
- Graphs
- Aggregated Queries
- Pivot Tables
- Using the CorVu Menu Designer
- Creating Quick Reports
- Importing & Joining Dynamarts
- Creating Crosstab Queries
- Executive Alerts

CorBusiness Applications II

This course is designed for people that have already taken the introductory CorVu courses and want to learn about some of the advanced features of CorVu.

Prerequisites: 'Applications I', 'Production Reports', and CorVu development experience

Length - Price: 2 days - \$1,440/student + GST

This course covers

- Writing your Own Formulas
- Complex Conditions and Filters
- Multiple Join Queries
- Ranking
- Date Functions and Conditional Crosstabs
- Speciality Graphing Functions
- Determining Percent of Total
- Advanced Report Writer Features
- Quick Report Advanced Features
- Clones

CorBusiness Production Reports

This course is designed for people that have advanced reporting requirements and want to learn how to create production reports using the CorVu Report Writer.

Prerequisites: 'Applications I'

Length - Price: 1 day - \$720/student + GST

This course covers:

- Creating and Modifying Reports
- Creating Totals and Subtotals
- Setting up a Title Page
- Master/Detail reports
- Cross-Tab Reports
- Embedding Graphs in a Report
- Multiple Queries in Reports
- Modifying the Underlying Query

CorBusiness Application Administration

This course is designed for the people responsible for the installation, implementation and administration of CorVu.

Prerequisites: Strong understanding of Windows, Relational Database concepts and Client/Server functionality.

Length - Price: 1 day - \$720/student + GST

This course covers:

- The CorVu Architecture
- Establishing a database connection
- Creating Picklists
- Data Type Overrides
- Data Server Manager
- Security – database, dynamart, user
- Using the Scheduler
- Application Portability

CorBusiness CorPortfolio

This course is specifically aimed at business users, managers and executives who have reporting requirements from CorVu through CorPortfolio. CorVu and non-CorVu objects can be linked and updated together in this desktop publishing application.

Prerequisites: 'Applications I'

Length - Price: ½ day - \$480/student + GST

This course covers:

- Portfolio Format Options
- Modifying Portfolios
- Creating Portfolios
- Working with Objects
- Adding Objects
- Sub-documents

CorStrategy User

The CorStrategy User course is designed for business users who are: Owners - responsible for tracking measures through graphs, strategy maps and reports; Updaters – who use webforms to update measures within a scorecard; and Executives – who need to see the overall strategic scorecard. It is complemented by the 1-day CSM Administrators course for those users who will also build and maintain scorecards.

Prerequisites: 'Applications I'

Length - Price: 1 day - \$720/student + GST

This course covers

- Scorecard Implementations
- Navigating around your Scorecard
- Setting up a Scorecard Structure
- Creating Strategy Maps
- Importing Scorecard Structures
- Using Briefing Books
- Importing Measure Dat
- Data: manual entry, importing, web forms

HyperVu

The CorVu HyperVu course is a comprehensive full day class for any HyperVu users. The HyperVu module is a powerful tool for publishing CorVu performance management information through interactive HTML pages. It provides fast and easy access to reports, graphs, executive dashboards, and scorecards via a web browser.

Prerequisites: 'Applications I'

Length - Price: 1 day - \$720/student + GST

This course covers:

- Introduction to HyperVu
- CorPortfolio
- Installing HyperVu
- Other CorVu Objects
- Publishing Quick Reports
- HyperVu Server Configuration

CorVu for Business Users

This course is designed with a company's own data and delivered to CorVu personal or run-time users. It can also be developed for internal trainers to deliver.

Prerequisites: Familiarity with basic Windows functions.

Length: ½ - 1 day (Delivery); 2-3 days (Development)

Price: \$1,750 a day + GST for up to 10 attendees

This course covers:

- Your CorVu Reporting System
- Creating Graphs
- Drilling into Reports and using Prompts
- Adding Graphs to Reports
- Creating & Modifying Quick Reports
- Working with Queries and DynaMarts

CorBusiness 5.2 Enhancements

This is a full-day comprehensive course designed to cover the key new features and functions within CorBusiness version 5.2. There are separate courses for the CSM modules, and the programme includes a module at the end of the course for system administrators to run through the changes to the administrative functions within CorBusiness, including the Knowledge Library and user management. The course will benefit anyone using the new version of CorVu or contemplating upgrading in the near future.

Prerequisites: Completion of the CorBusiness Applications I course or equivalent experience with CorVu.

Length: 1 day

Price: \$720 per student + GST

This course covers:
